

List of Validated Payment Applications

As of October 31, 2007

Inclusion on this list indicates only that the **specific** version of payment application has successfully completed an assessment following Payment Application Best Practices. Please be advised that Visa makes no endorsement of applications or products or each of their respective developers or distributors and disclaims all warranties express or implied. Members remain responsible for performing their own evaluation and due diligence, to ensure the CISP compliance of their merchants and service providers. The applications reviewed here may be only one component of a suite of payment applications, with the suite consisting of other vendors' products or plug-ins that has not been reviewed. To be a fully compliant solution, all applications in a payment suite will need to undergo this same review. Visa has not evaluated and does not express any opinion as to the compatibility or effectiveness of any other vendor's products or plug-ins when used in conjunction with another vendor's payment application.

PABP reviews are valid for one year, with annual attestation due to Visa one year from the below "VALIDATION DATE". Attestations that are from 1-60 days late are noted in **yellow** and reports that are from 60-90 days late are noted in **red**. Entities with reports over 90 days past due will be removed from this list.

SOFTWARE VENDOR	PAYMENT APPLICATION	APPLICATION VERSION	VALIDATION DATE (1)	DESCRIPTION
911 Software www.911software.com	CreditLine	3.00.04	January 13, 2006 (no change)	Middleware payment processing that offers multiple forms of inputs for processing (virtual terminal, API, COM, batch, POS Terminal, and ASP input forms)
ACI Worldwide, Inc. www.aciworldwide.com	BASE24-pos	6.0V6	April 11, 2006 (no change)	Middleware transaction process. Target Market: Processors

(1) An annual validation is required for those payment applications with major upgrade or product version changes. If there are no changes to the product, Visa will require a letter signed by an Officer of the software company indicating no changes to the payment application and continued adherence to the Payment Application Best Practices. Visa will also require a letter from the security assessor that concurs with the software vendor's letter, supported by the level of work the assessor feels is necessary to be able to concur. Visa will note that there were no changes to the product
